

Jose Alberto Cansado

Junior Software Developer

jobetcansado@gmail.com

PROFESSIONAL SUMMARY

Junior software developer with production-level experience building data pipelines, automation systems, AI-integrated applications, and full-stack web tools. Skilled in backend logic, API integrations, database design, and front-end interfaces. Strong foundation in machine learning concepts, data analysis, and real-time reporting. Seeking opportunities in software development, data engineering, or AI/ML-adjacent roles.

EDUCATION

Bachelor of Science in Computer Science

Mapua Malayan Colleges Laguna | 2022 - 2026

Relevant Coursework: Python, C#, .NET, SQL, Machine Learning, Data Science

TECHNICAL SKILLS

Languages:	Python, JavaScript, C#, SQL, Regex
Backend & APIs:	REST API design, webhook architecture, OAuth, .NET, n8n workflow automation
Databases:	PostgreSQL (Supabase), relational schema design, upsert/idempotency patterns
AI & ML:	LLM prompt engineering (GPT, Gemini), AI agent design, NLP text extraction, machine learning, data science
Frontend:	HTML/CSS, JavaScript, HubSpot CMS, Vercel, responsive UI
Data & Analytics:	Pipeline design, data normalization, deduplication, rolling-window metrics
Tools:	Git, Heroku, Slack API, Twilio, browser automation, HubSpot CRM

PROFESSIONAL EXPERIENCE

Junior Software Developer

Playbook Sports (CallPlaybook) | Oct 2025 – Apr 2026 | Remote

Payment Onboarding Automation

- Built multi-phase automation replacing manual payment gateway onboarding, saving 3-5 hours per client
- Implemented fuzzy string matching with ~85% auto-match accuracy across data sources
- Integrated 4 external APIs (payment processor, CRM, messaging, infrastructure) in a single pipeline

Conversational AI Voice Agent System

- Maintained AI-powered phone agent for inbound SaaS sales calls with lead qualification
- Built real-time analytics dashboard tracking call quality across rolling time windows
- Automated follow-up SMS sequences for incomplete calls to improve re-engagement

Customer Data Pipeline & AI Analysis Engine

- Built data ingestion pipeline pulling call recordings from third-party APIs with CRM enrichment
- Designed relational schema with idempotent upsert logic; reduced API calls by 60-70% via incremental sync

AI-Powered Client Intelligence & Reporting

- Developed LLM-based reporting tools aggregating data from 4+ systems into daily health summaries
